Allowable Subject Matter

1. The following is a statement of examiner reasons for allowance of claims 1-12, 21-32, 41-36:

The present invention is directed to an apparatus, a method and a computer readable recoding medium for recording a computer program for detecting a frequency characteristic of an input signal. Independent claims 1, 21 and 41 identify the uniquely distinct features "selecting a one level of a section from a plurality of sections labeled with different levels with respect to the indication value and determining the selected level as the frequency characteristic". The closest prior art of record to Greggain (US 5,602,599) and Golin (US 5,331,414) disclose detecting a frequency characteristic of a signal and difference between frequency of an image signal processor and desired filtering frequency, however singularly or in combination, fail to anticipate or render the above limitation obvious.

Communication

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sherali Ishrat whose telephone number is 571-272-7398. The examiner can normally be reached on 8:00 AM - 4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matthew Bella can be reached on 571-272-7778. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
